### ABOUT ME

Frontend Software Engineer with 5 years of experience building web products in international environments. Experienced in React, Typescript and Node.js, with a strong background in product development and legacy modernization.. Fluent in French, English and German.

### DEGREES

2021 - 2023

#### OPENCLASSROOMS

- Advanced Web Development (React & TypeScript)

2020 - 2021 (4-year degree)

#### UNIVERSITÉ DE STRASBOURG

- Full-stack Development

### SKILLS

#### • Frontend

React, TypeScript, JavaScript

#### • Mobile

React Native, Flutter, Kotlin, Swift

#### • Backend

Node.js, Express, Django

#### • Cloud & DevOps

Docker, CI/CD, Azure, Firebase

### EXPERIENCE

#### Actimage GmbH

Frontend Software Engineer

2021 - PRESENT

#### Smart Parking Solution (React TS) 2023-PRESENT

- Designed and developed a React-based administration dashboard for managing users, vehicle fleets, parking operations, reservations, and incident reporting.
- Architected the portal using a feature-first design pattern, improving maintainability and scalability.
- Built reusable, type-safe React and TypeScript components consumed across multiple features.
- Integrated REST APIs and implemented efficient client-side state management for complex business workflows.
- Optimized performance through lazy loading, memoization, and bundle size reduction.
- Collaborated in an Agile, cross-functional team, participating in code reviews and technical design discussions.

#### Live Data Dashboard for operators (React TS) 2025-PRESENT

- Architected, designed, and developed a multi-tenant, multi-role React-based dashboard for monitoring and managing IoT-connected tank control systems.
- Built real-time data visualization dashboards using interactive charts and live telemetry streamed from IoT devices.
- Implemented role-based access control to provide tailored experiences for operators, technicians, and administrators.
- Designed a scalable frontend architecture with reusable components and shared business logic, improving maintainability and development velocity.
- Collaborated with backend, embedded, and product teams to deliver reliable monitoring tools for industrial operations.
- Optimized dashboard performance to efficiently render high-frequency data updates while maintaining a responsive user experience.

#### Cross-Functional Contributions

- Designed, implemented, and maintained CI/CD pipelines using GitLab CI, TeamCity, and Fastlane Match.
- Introduced unit and integration testing practices on projects with limited quality assurance processes.
- Conducted code reviews, produced technical documentation, and mentored junior developers.
- Collaborated closely with designers and backend teams (Node.js, Django, Strapi) to ensure consistency across frontend, mobile, and backend systems.

### LANGUAGES

- English: Professional proficiency
- French: Native
- German: Professional proficiency
- Japanese: Currently learning

### PROJECTS

- VR Startup Platform** - Co-founded a VR startup and led development of a booking and social-sharing platform.
- Bakery Management System** - Developed an internal business management platform using React and Django.
- Gaming Review Platform** - Built a React and Node.js content publishing platform.
