ABOUT ME

Fullstack Software Engineer with 5 years of experience building web products in international environments. Experienced in React, Typescript and Node.js, with a strong background in product development and legacy modernization.. Fluent in French, English and German.

DEGREES

2021 - 2023

OPENCCLASSROOMS

- Advanced Web Development (React & TypeScript)

2020 - 2021 (4-year degree)

UNIVERSITÉ DE STRASBOURG

- Full-stack Development

SKILLS

• Frontend

React, TypeScript, JavaScript

• Mobile

React Native, Flutter, Kotlin, Swift

• Backend

Node.js, Express, Django

• Cloud & DevOps

Docker, CI/CD, Azure, Firebase

EXPERIENCE

Actimage GmbH

Fullstack Software Engineer

2021 - PRESENT

Smart Parking Solution (React TS, Strapi) 2023-PRESENT

- Designed and developed a React-based administration dashboard for managing users, vehicle fleets, parking operations, reservations, and incident reporting.
- Architected the portal using a feature-first design pattern, improving maintainability and scalability.
- Built reusable, type-safe React and TypeScript components consumed across multiple features.
- Developed and integrated Strapi APIs, extending content types, permissions, and endpoints to support frontend business requirements.
- Optimized performance through lazy loading, memoization, and bundle size reduction.
- Collaborated in an Agile, cross-functional team, participating in code reviews and technical design discussions.

Emission measurement tool (Django Python) 2024-2025

- Architected and developed a Django-based platform enabling construction companies to measure carbon emissions and evaluate the effectiveness of green initiatives throughout the project lifecycle.
- Built a configurable calculation engine implementing complex business rules for emissions estimation based on construction activities, materials, and project characteristics.
- Designed RESTful APIs and database models to support project management, sustainability metrics, and historical reporting.
- Optimized database queries and backend performance to efficiently process large construction datasets.
- Collaborated with product owners and environmental specialists to deliver features aligned with sustainability regulations and industry best practices.
- Contributed to code reviews, testing, and Agile development processes to ensure a reliable and maintainable platform.

Cross-Functional Contributions

- Designed, implemented, and maintained CI/CD pipelines using GitLab CI, TeamCity, and Fastlane Match.
- Introduced unit and integration testing practices on projects with limited quality assurance processes.
- Conducted code reviews, produced technical documentation, and mentored junior developers.
- Collaborated closely with designers and backend teams (Node.js, Django, Strapi) to ensure consistency across frontend, mobile, and backend systems.

LANGUAGES

- English: Professional proficiency
- French: Native
- German: Professional proficiency
- Japanese: Currently learning

PROJECTS

- **VR Startup Platform** - Co-founded a VR startup and led development of a booking and social-sharing platform.
- **Bakery Management System** - Developed an internal business management platform using React and Django.
- **Gaming Review Platform** - Built a React and Node.js content publishing platform.
